Website Requirements Document

Project Title: Corporate & Individual Vehicle Rental Website

Overview
The company provides rental services for Cars, Buses, and Canters for corporate and individual clients. The website must be modern, clean, minimalistic, and easy to navigate.

Target Users
- Corporate travel coordinators
- Individual travelers
- Event organizers
- Small logistics users

Design Guidelines
- Light, minimalistic interface
- No dark colors
- White or very light gray backgrounds
- Gray-toned cards with subtle shadows
- Sans-serif fonts (Inter/Poppins)
- Rounded corners and spacious layout
- Illustrations required for service cards (Car, Bus, Canter)

Technology Requirements
- Built with Next.js
- Modular, reusable components
- Mobile-first responsive design
- Fast loading pages, optimized images
- Booking API route
- Input validation and basic security

Website Architecture

Home Page
- Hero section with transportation illustration
- Taglines:
"Skip the traffic, take your trip."
"Ride as you like it."
- CTAs: Book Car, Book Bus, Book Canter
- Service overview cards with illustrations

Services Page
- Three detailed service cards:
Car Rental, Bus Rental, Canter Rental
- Illustration + description + CTA

Driver Contacts Page
- List/table of driver details:
Name, vehicle type, availability, phone
- "Request this Driver" optional button

Booking Page
- Form fields:
Name, phone, email, vehicle type, pickup, drop, date, time, duration, notes, preferred driver

About Us Page

- Company mission, fleet overview, service reliability

Contact Page
- Address, phone, email, small query form

Footer
- Quick links and contact information

Visual Style
- Backgrounds: #FFFFFF / #F7F7F8
- Cards: #EFEFEF / #E7E7E9
- Text: #1A1A1A (primary), #6B6B6B (secondary)
- Accent: soft blue or teal (optional)
- SVG illustrations for clarity

Components
- Hero Banner
- Service Card
- Driver Card/Table
- Booking Form
- Modal
- Toast notifications

Performance & SEO
- Pre-render pages via SSG/SSR
- Proper metadata
- Optimized images and SVGs

Deliverables
- Next.js project with complete structure
- Assets folder (illustrations/icons)
- Working booking API
- Demo data for services and drivers
- Deployable build for Vercel

Acceptance Criteria
- Fully responsive UI
- Proper illustrations in service cards
- Functional driver list
- Working validated booking form
- Minimal, clean light-gray design
- Lighthouse mobile score 80+
